## SUMMARY

I am an efficient and hardworking software engineer specialized in backend engineering. I have developed and deployed robust APIs and database for several users.

## PROFESSIONAL EXPERIENCE

ALX Africa, Nigeria

— *Community champion*

May 2024 - July 2024

- Manage a squad of more than 40 learners to complete a course on AI and Career essentials
- Organized weekly online meetings to assist learners interact and complete their milestones.
- Created posts that increase the squad interactions and engagement by 100%.

## SKILL

- Low level programming: C
- Backend Technologies: Python, Nodejs, Flask, Django
- Database Management: MySQL, MongoDB, Redis
- Frontend Technologies: HTML, CSS, JavaScript, Reactjs Tailwind
- DevOps: Puppet, fabrics
- Servers: Nginx

## LANGUAGES

English, Ibibio, Ejagham

## EDUCATION

Community Secondary School, Oban Town, Nigeria

— *West African School Certificate*

SEPTEMBER 2011 - May 2017

ALX Africa

— *Certificate in software engineering*

January 2023 - April 2024

## PROJECTS

**RevTax** — *A revenue management web application*

Collaborated with a team of software engineers to develop a web application that digitized revenue payment, using Nodejs, Expressjs, MongoDB and JWT for the backend Typescript, Reactjs and Tailwind CSS for the frontend.

We implemented a secure signup and login functionality and a user friendly dashboard for creating and managing business and payments for both users and administrators.

We implemented a payment functionality using flutter wave API.

### **Career Gate** — *A web application for career consultants to reach their clients.*

Teamed up with a colleague to build a web application where people seeking career assistance can sign up and schedule a session with an expert providing their resume in the process.

We implemented the project with Python (Flask), Jinja2, MySQL, HTML, CSS (Materialize CSS) and calendly API.

The functionalities include:

- Sign up and login
- Session booking using calendly.
- A user friendly dashboard.

### **Simple shell** — *A command line interpreter*

Implemented a command line interpreter that functions like a Linux shell implemented in C. Mastering the concept of low-level engineering, memory management and process management.
